Re: HDRC Case #2018-042 – 231 Adams - *King William Historic District*
Certificate of Appropriateness – Rear Yard Light Pole

Dear HDRC Commissioners,

The King William Association Architectural Advisory Committee reviewed the project and concurs with OHP staff recommendation for denial. There are existing lights surrounding the basketball court. A spot light on the back porch points toward the backyard court and a spot light on the shed to the side of the court is directed towards the driveway on Wickes. A street light on the corner of Stieren and Wickes on the other side of the street from the court contributes to illuminating the court. The AAC recommends that the applicant consider a light mounted in the large pecan tree adjacent to the basketball court to supplement the current lighting fixtures mentioned above to prevent annoying the neighboring residences with a high output pole mounted light fixture.

Best Regards,

Mickey Conrad
Chair, Architectural Advisory Committee

Chris Price
President, KWA Board of Directors
