Re: Case #2016-5439: 631 Mission St. – *King William District*  
Certificate of Appropriateness – Solar Panels

Dear HDRC Commissioners,

The King William Association Architectural Advisory Committee reviewed the project and concurs with the OHP staff recommendation for approval and their stipulations. We appreciate the effort to conceal the panels from view from the right of way. The top two panels will be exposed but it appears that the solar panels can be reconfigured to be completely hidden from the view of the right of way.

Best Regards,

Mickey Conrad  
Chair, Architectural Advisory Committee

Chris Price  
President, KWA Board of Directors
